NPIC/TSSG/RED-1905-69
3 November 1969

MEMORANDUM FOR THE RECORD

SUBJECT : RED Personnel Comments on Post Office R&D Efforts

REFERENCE: NPIC/TSSG/RED-1804-69, dated 16 September 1969 - Discussions With
Post Office Personnel Regarding R&D Efforts

1. Chief, Research & Engineering Division:

a. I would like you to set up the liaison--attached are the other Branch's comments.

b. I suggest you and reps from the Branches go over and talk to them. Bud can effect introduction and indicate this is a follow up from our past meeting.

2. Deputy Chief, Research & Engineering Division:

a. This looks very interesting; there should be much of common interest. I would like to see their operations. We should gain some knowledge in the area of material handling and information storage and retrieval. I would recommend that [] and I review. The main point is a broad knowledge of building functions is needed.

b. The fluidics effort sounds like what [] is doing. It definitely has applications here in the Center.

3. Special Assistant for Plans & Applications, RED:

a. From your description, I didn't get the impression that PO R&D had anything really vital to offer--but that there is enough correlation to justify continuing liaison with them.

b. I would be glad to establish such liaison if you want.

4. Chief, Systems Development Branch, RED:

a. I would like to have [] contact the Post Office on Materials Handling and Fluidics.

b. Arrange to have [] and Rod look over their work in optical character reading as to applying it to data block and time track reading.
